THE BEST RUN **SAP**

# 7 Reasons CPOs Use
# SAP Business Technology Platform
# for Spend Management

"Over the past 18 months, I have seen a step change in the capability of our procurement team, delivering a range of tangible results. Our decision to invest in people, core processes, and technology means procurement is now perceived as an indispensable business partner"

Joanne Wilson
CFO, Britvic plc

### Connect data, applications, and processes to deliver a unified procurement experience

SAP BTP enables a connected system that lessens infrastructure costs and simplifies operational complexity.

### Tailor procurement processes to suit your unique business needs

With data-to-value outcomes, integration enablement, and extensible and personalized application solutions, SAP BTP meets CPOs' critical expectations for functional fit.

### Manages expenses with real-time visibility into spending, spend categories, and suppliers

Make smarter purchases by connecting, managing, and governing procurement data and activities.

**SAP procurement solutions + SAP BTP**

### Deliver an intuitive, seamless user experience that adapts to changing needs

Create personalized experiences with flexible application development, process management, and intelligent business services.

### Automates repetitive tasks to improve reliability and employee productivity

Increase accurate execution of mundane tasks and free employees to focus on higher value work.

### Get 360° visibility into spend performance to identify new opportunities and better alternatives

Gain deep insights into departments, buying categories, and suppliers for a clear view of overall spend in real time.

### Infuse intelligence into processes with embedded artificial intelligence

Make smarter decisions with AI that drives insights and predictions to ensure optimal business performance.

## Connect spend to actions and outcomes with SAP Business Technology Platform (SAP BTP)

Help ensure every purchase – from indirect and direct spend to maintenance, repair, and operation services and contingent labor – is based on foresight and informed decision-making.
