SAP BTP brings together application development, automation, data management, analytics, planning, integration, and AI into a single platform.

Build

- **Extend** procurement processes and adapt solutions to your business needs
- **Create** new business processes to enhance the buyer experience
- **Augment** existing features and functions

Connect end-to-end processes

- **Reroute** existing business processes to adapt to your business needs
- Seamlessly **link/extract** critical data from/to external sources and third-party systems
- **Integrate** across SAP and ERP solutions

Plan and analyze

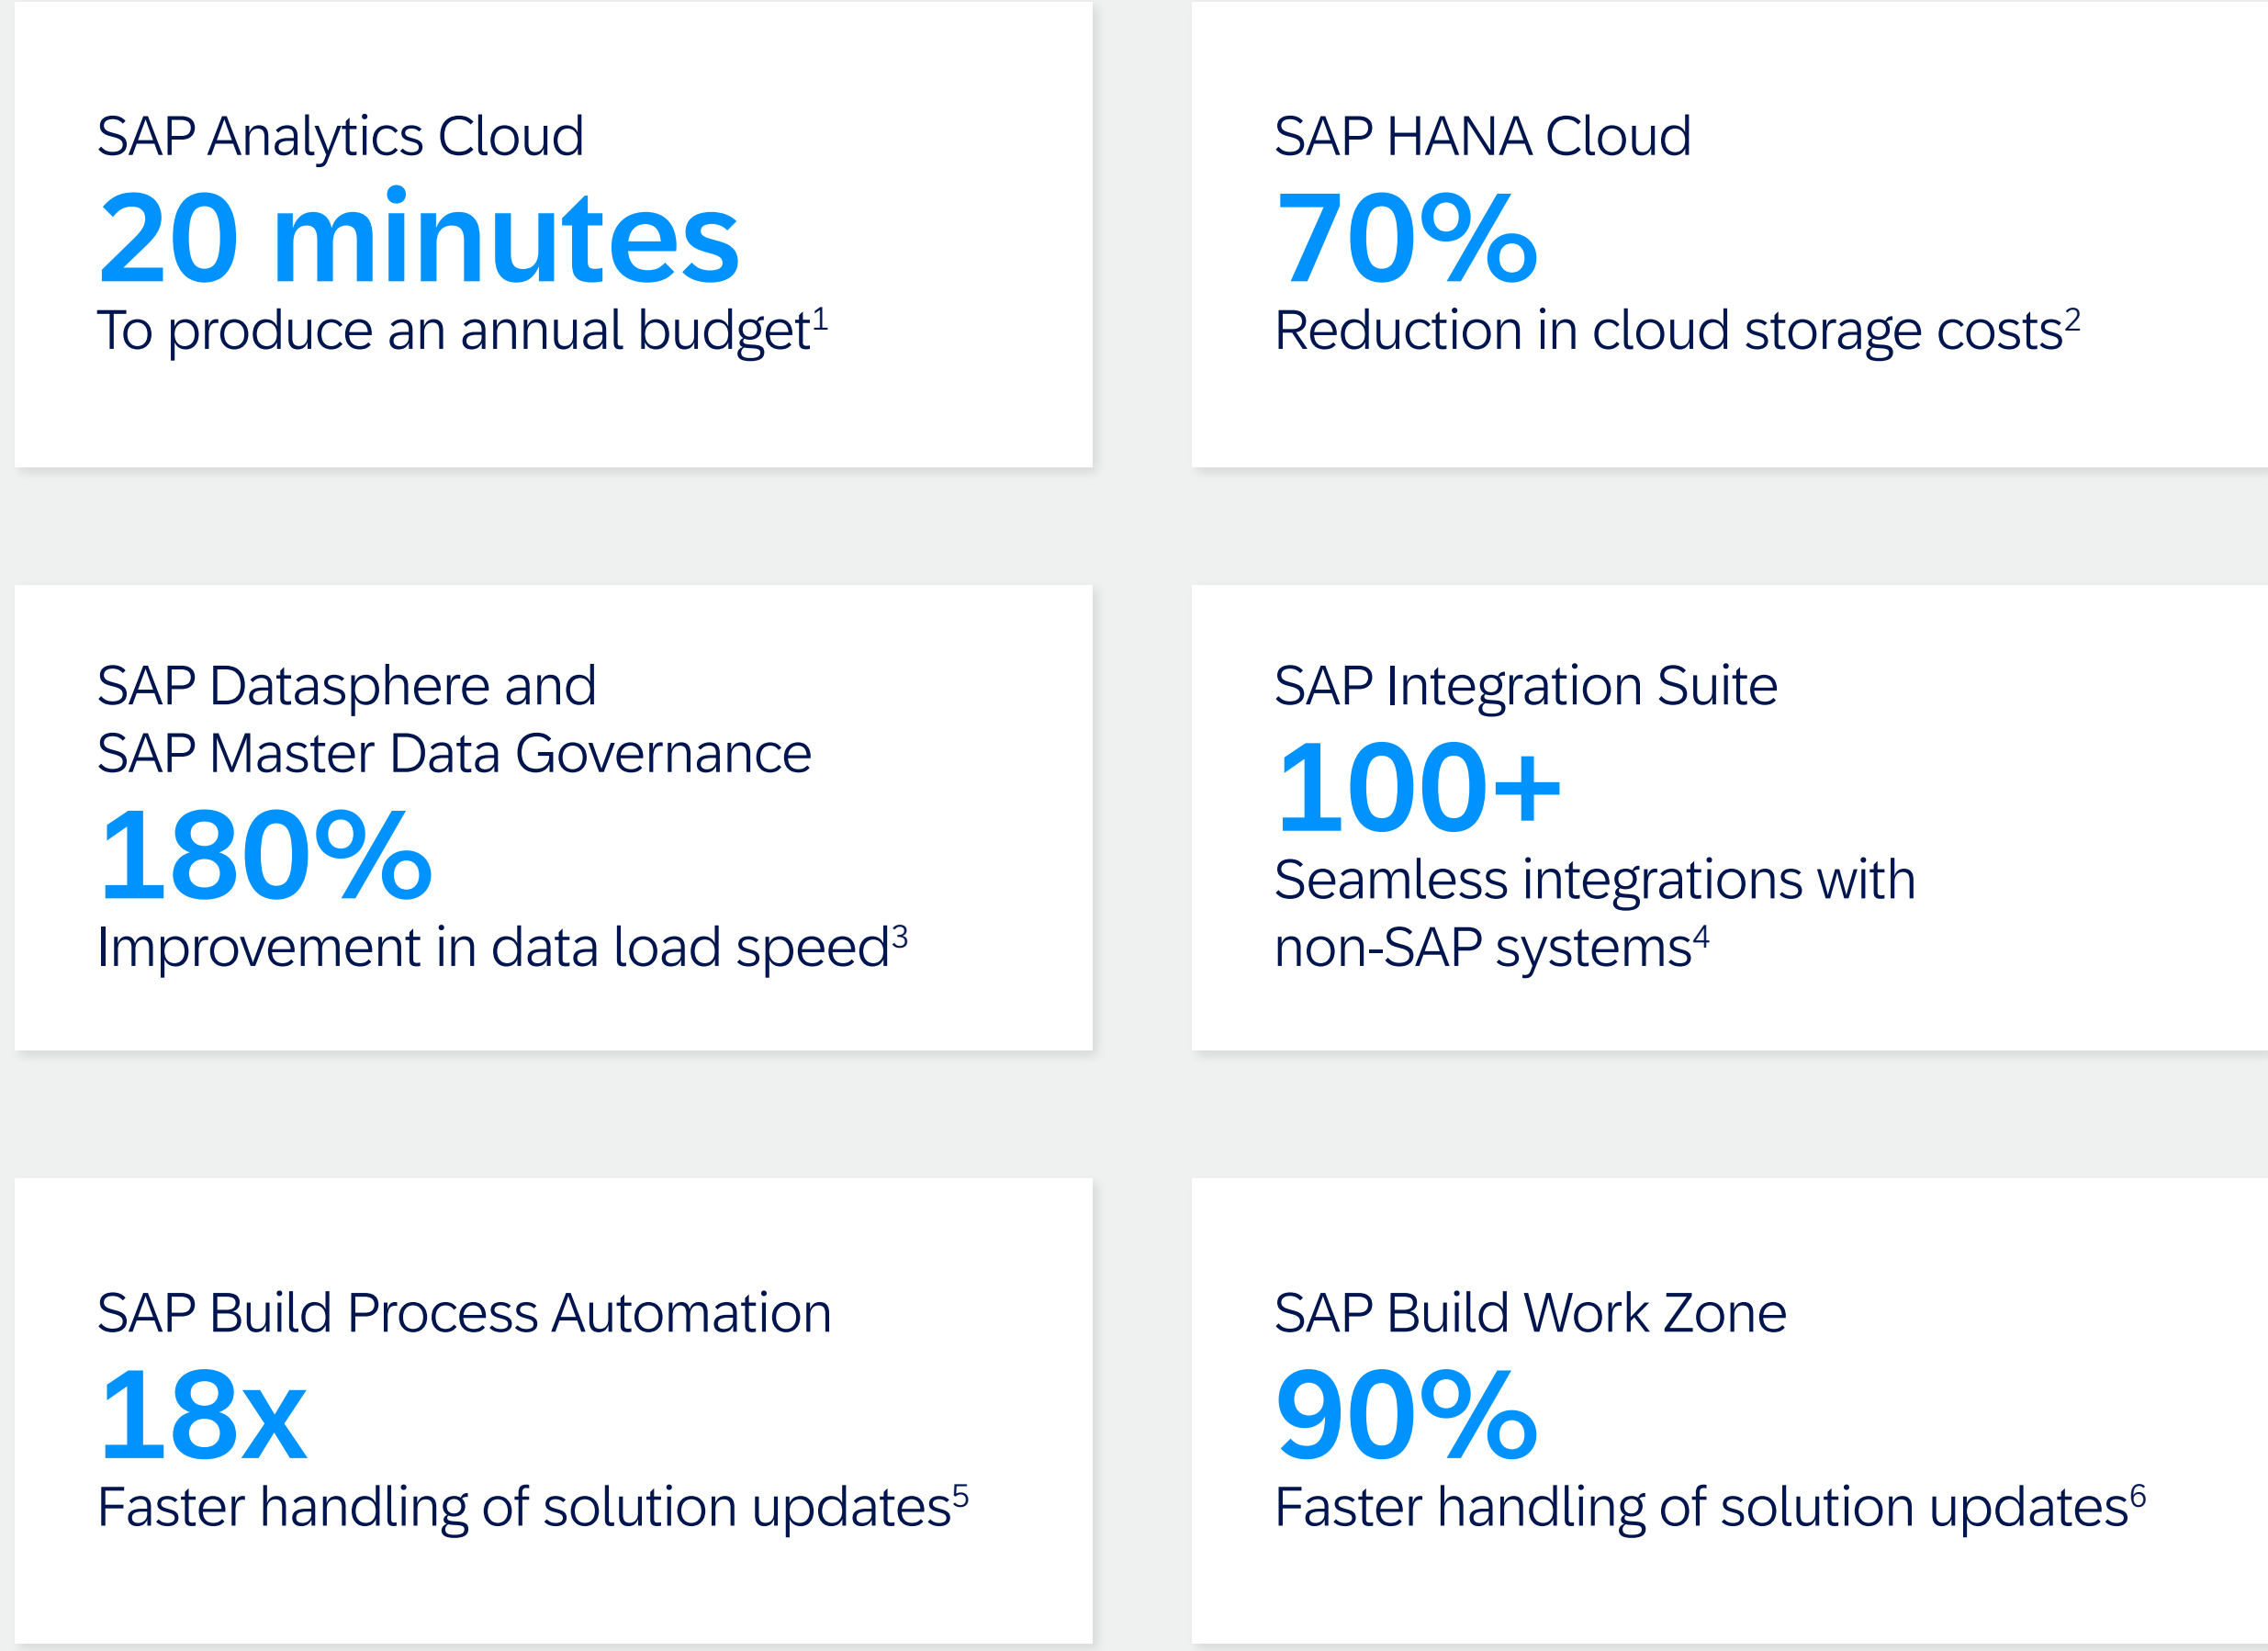

- **Cross-process visibility** across multiple KPIs
- **360-degree visualizations** across spend categories and suppliers for making informed decisions
- **Insights and predictions** to ensure optimal business performance

Infuse AI into every aspect of your business

- Machine learning for **personalized recommendations**
- Generative AI (GPT-4) for **quick, informed, and accurate results**
- **Responsible AI** – built on leading ethics and data privacy standards

SAP BTP delivers results for SAP procurement customers
