

Alter Domus: Scaling globally by addressing legal regulations and mitigating compliance risks

Alter Domus Participations SARL, a professional services company and a leading player in the alternative investment sector, faced significant challenges in addressing new legal regulations arising from macroeconomic and geopolitical situations. For example, the VAT rate reductions brought in across several countries during the COVID-19 pandemic. Alter Domus wanted to be able to adapt quickly to changing tax rates and revert back once the rates expired.

Moreover, the company had to comply with fast-growing legal mandates, including data protection and privacy regulations such as the General Data Protection Regulation, digital-document initiatives, and digital tax financial reporting. Alter Domus sought a compliance management solution that could automate processes, help manage regulatory changes, and mitigate compliance risks.

Improving compliance through real-time insights for better decision-making with SAP S/4HANA Cloud Public Edition

Before: Challenges and opportunities

- Complex regulatory compliance across multiple countries, with individual manual processes proving inefficient and time-consuming, and difficulty managing and adapting to changing legal regulations
- High reliance on paper-based documentation and lack of real-time visibility into key performance indicators

Why SAP

- SAP S/4HANA Cloud Public Edition, enabling real-time analytics for informed decision-making
- Expertise in country-specific localization for the professional services industry
- Time-dependent functionality across countries and localization as a self-service capability for customization and adaptation
- SAP Preferred Success services for guidance in optimizing SAP investments, gaining operational efficiency, and driving innovation within the organization to achieve better business outcomes

After: Value-driven results

- Delivered continuous updates on new and changing regulations
- Successfully implemented country-specific localization requirements
- Increased collaboration and communication among teams and locations
- Allowed real-time visibility into key performance and compliance indicators, leading to improved decision-making

“SAP S/4HANA Cloud Public Edition has been instrumental in enabling our collaboration across departments and countries, helping ensure compliance with local regulations, and **providing real-time insights for better decision-making**. The cloud solution's flexibility has empowered us to innovate and improve our processes, creating an ideal partnership.”
