Sage Partner

Healthcare organisations operate in a fast paced, patient focused environment where accountability, efficiency, and quality of care are critical. As providers manage multiple clinics, services, and funding streams, the complexity of tracking finances, operational outcomes, and regulatory compliance increases. This eBook explores why implementing an Enterprise Resource Planning (ERP) solution is a strategic investment for healthcare organisations and why selecting an ERP system designed for multi entity financial management, operational reporting, and cash flow oversight is essential for sustainable growth and improved patient outcomes.

15	Conclusion

Why Healthcare Organisations Need an ERP Solution

Healthcare providers manage multiple clinics, programs, branches, and service offerings while maintaining strict compliance with financial, regulatory, and operational reporting requirements. ERP software built for healthcare streamlines financial management, reporting, and operational oversight, enabling organisations to focus on patient care and service delivery. Key capabilities include:

- Multi entity and branch accounting
- General ledger dimensions for divisions and locations
- Automated accounts payable and purchasing workflows
- Real time dashboards, KPIs, and reporting
- Cash management and financial consolidations

Benefits of ERP Software for Healthcare Providers

- **Time Savings Through Automation:** Reduce hours spent on manual reporting and reconciliations
- **Enhanced Control Over Operations:** Improve purchasing, accounts payable, and internal controls
- **Data Driven Decision Making:** Provide management with actionable insights through dashboards and KPIs
- **Real Time Analysis:** Identify risks and opportunities across branches and service lines
- **Scalability:** Support multiple clinics, labs, or service divisions, and simplify multi entity consolidations

The Nature of Healthcare Business Models

Healthcare organisations rely on a mix of patient fees, insurance payments, government funding, and grants. Multi site operations, service diversification, and regulatory compliance create complexity in managing revenue, cash flow, and expenses. Real time visibility into financials, programmes, and operational costs ensures effective decision making and sustainable growth.

Key Challenges for Growing Healthcare Organisations

- Managing multiple entities, branches, and divisions
- Tracking revenue and expenses across services and locations
- Manual bookkeeping and reporting inefficiencies
- Accounts payable, purchasing, and internal control challenges
- Multi entity consolidation and compliance reporting
- Limited visibility into cash flow, KPIs, and operational performance

Unlocking Impact: ERP Software for Modern Healthcare Organisations

Drive operational efficiency and financial transparency with ERP software built for complex multi entity management, clinic and service operations, and diverse funding and revenue streams.

Common Cloud Features for Healthcare Providers

Multi entity and intercompany support

Real time financial and operational analytics

Role based dashboards for CFOs, clinic managers, and executives

Streamlined accounts payable and procurement workflows

Automated reporting for management, auditors, and stakeholders

Predictive insights and KPI monitoring

Mobile access

Scalable architecture

Choosing the Right ERP Solution for Healthcare Providers

When evaluating ERP software, healthcare providers should look for:

- Cloud native architecture for remote access and scalability
- Multi entity, multi branch, and multi division reporting
- Accounts payable, purchasing, and workflow automation
- Integrated dashboards, KPIs, and real time reporting
- Compliance support for the finance team

Real World Case Study

Company: ERS Medical

Industry: Healthcare Services / Patient Transport

Challenge:

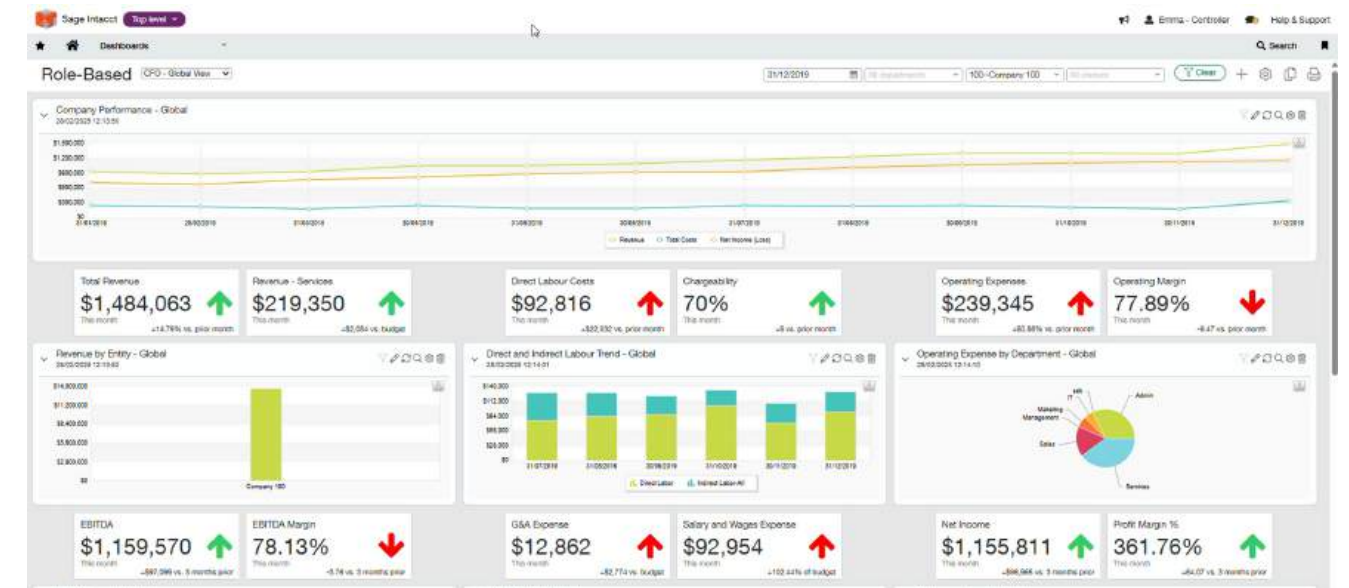

Managing large volumes of financial and operational data across multiple sites and customer contracts was slow and manual. Generating reports took up to 15 minutes per report, dashboard creation took months, and accounts payable runs were time intensive, limiting the finance team's ability to provide timely insights for decision making.

Solution:

Implemented Sage Intacct Cloud ERP to automate reporting, centralise financial data, enable real time dashboards, and streamline accounts payable, budgeting, and contract profitability tracking.

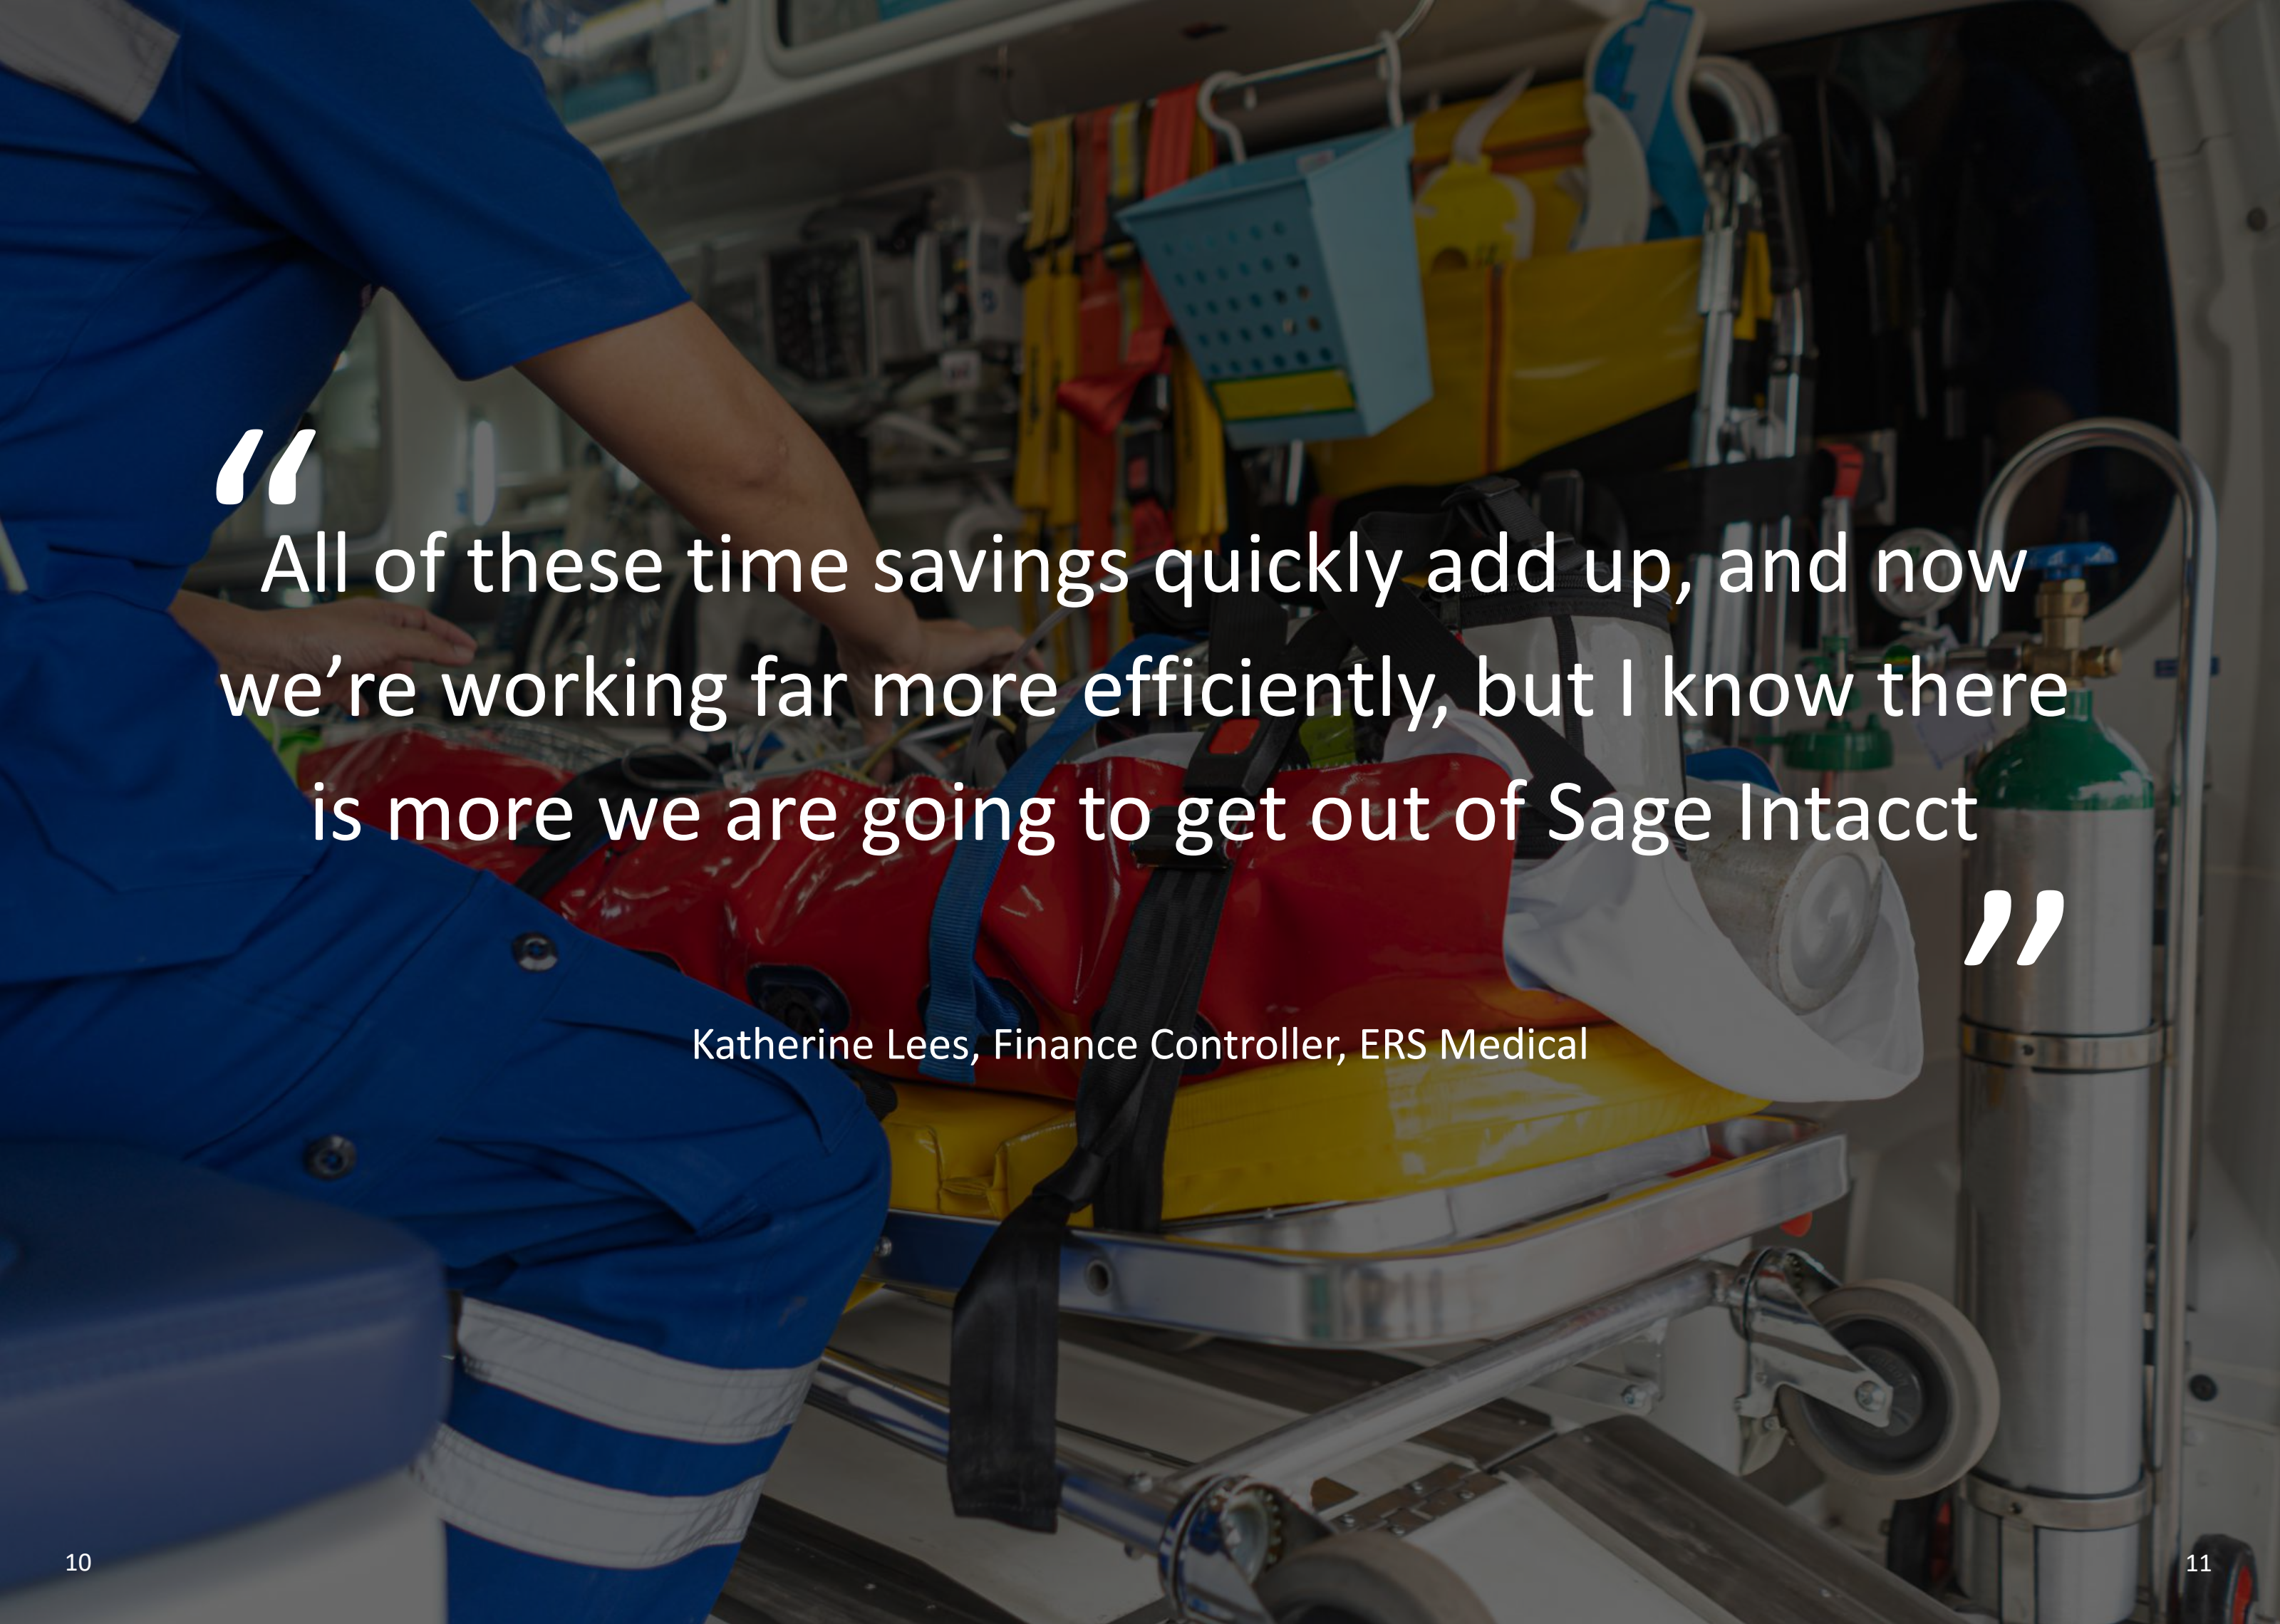

Results:

- Reporting time reduced from 15 minutes per report to seconds
- Dashboard creation reduced from 4 months to 1 day
- Accounts payable run reduced from 4 days to 4 hours per month
- Real time insights into contract profitability, site performance, and cash flow
- Finance team freed from manual tasks to focus on analysis and strategic decision making
- Enabled comparison of multi site performance for operational efficiency
- Streamlined budget creation and forecasting across multiple contracts and sites
- Supported data driven recommendations for site level performance improvements

Implementation Considerations

When implementing a financial management solution in a healthcare organisation, it is important to map financial, branch, and service workflows based on the reporting outcomes that the business requires. Access to the right data is critical for decision making. Aligning finance and operations (using industry specific solutions) is essential for cohesive adoption, while focusing on change management helps staff embrace new processes effectively. Defining key performance indicators (KPIs) such as service line profitability, operational efficiency, and cash flow metrics provides a clear measure of success. Partnering with ERP software experts who have experience in healthcare operations can further ensure a successful and sustainable implementation.

“ All of these time savings quickly add up, and now we’re working far more efficiently, but I know there is more we are going to get out of Sage Intacct ”

Katherine Lees, Finance Controller, ERS Medical

Sage Intacct for Healthcare

Sage Intacct is a great fit across:

Medical Practices	Nursing Homes and Aged Care Facilities
Dental Practices	Specialist Medical Services
IVF and Fertility Clinics	Community Health Services
Labs and Diagnostic Centres	Clinics and Ambulatory Care Centres

In fact, any healthcare organisation that needs greater visibility across clinics and service lines, streamlined financial processes, and accurate reporting on revenue, expenses, and operational performance should consider Sage Intacct to transform their financial management.

Sage Intacct Out of the Box Functionality for Healthcare

- Multi entity and multi site reporting across clinics, labs, and service lines
- Service line budgeting and forecasting with budget vs. actual tracking
- Revenue and funding management including patient fees, insurance, and government funding
- Automated reporting for management, auditors, and stakeholders
- Payroll and workforce management integrations
- Advanced analytics for healthcare KPIs:
 - Service/program spend and fund utilisation
 - Operational efficiency by department or location
 - Cash flow forecasting
 - Resource and revenue tracking

**Focused on your success.
Backed by world class software**

Conclusion

For healthcare providers, ERP software is more than accounting—it's the foundation for operational efficiency, financial transparency, and sustainable growth. Sage Intacct helps healthcare organisations streamline processes, gain real time insights, and make data driven decisions, empowering teams to focus on delivering high quality care and expanding their impact.

Unlock Scalable Growth with Sage Intacct and Leverage Technologies

Implement a robust ERP solution like Sage Intacct with Leverage Technologies. Our team has the expertise to make your transition seamless and tailored to the unique needs of healthcare organisations. We've successfully helped providers streamline multi entity and branch accounting, improve financial visibility, and enhance operational efficiency, enabling better patient care and sustainable growth.
