

Manage complex financials with confidence

SAP Cloud ERP helps fast-moving organisations scale globally, reduce complexity and simplify financial management.

When business growth creates financial complexity

As businesses outgrow geographic borders, add new entities, buy out competitors or prepare for listing, finance gets much harder to manage. And running a lean finance team is difficult when revenue gets into the hundreds of millions, you're operating multiple entities in multiple countries, and transacting in different currencies.

What financial complexity looks like

- Multiple legal entities and complex ownership structure
- Cross-border operations and multi-currency transactions
- Localised compliance and accounting standards (GAAP, IFRS)
- Managing treasury and leases
- Transfer pricing and exchange rate fluctuations
- Auditing, ESG and green ledger requirements
- Growing volumes of intracompany transactions
- Fragmented reporting, inefficient workflows and difficult consolidations

From legacy systems to SAP Cloud ERP

Manual processes, disconnected data, compliance requirements and a myriad of challenges related to the growing financial complexity of your business become clear when using legacy finance systems.

Adding headcount and other resources to manage disparate systems and manual processes and workflows is costly and inefficient. Instead, look to the cloud for a powerful, scalable and flexible financial management system that reduces complexity now, and future-proofs your business for whatever comes next.

Beyond capability and compliance, a modern, cloud-native finance platform elevates finance to a strategic function that can deliver real-time insights and use predictive analytics to support better decision-making.

Power ahead with SAP Cloud ERP

Meet challenges head on with the advanced financial capability of a modern, secure and scalable platform built for growing businesses. SAP Cloud ERP delivers powerful automation, embedded AI and automatic upgrades to help you simplify finance, reduce cost of ownership and gain strategic insights.

Best of all, robust integration capabilities ensure it works seamlessly with the operating tools and applications you rely on to run your business, helping bring everything together for unified financial control, automated workflows and unprecedented efficiency.

Smart financial management powered by SAP

Cloud ERP

SAP Cloud ERP is designed to handle complex financial management across multiple entities, geographies, currencies and business structures. Provide your finance team with visibility, automation and confidence to navigate different compliance regimes, prepare for listing or acquisitions, and provide consolidated reports for a range of stakeholders.

Manage multiple entities, territories and currencies

Seamlessly manage complex structures with full support for intercompany and intracompany transactions, eliminations and consolidation. Operate across currencies, languages, and jurisdictions with ease.

Real-time consolidation

Accelerate period-end with automatic consolidation, live data access and reduced manual effort.

Advanced compliance and governance

Meet regulatory requirements across territories with support for GAAP, IFRS and local standards, with features including built-in separation of duties.

Treasury and cash management

Gain real-time visibility into cash positions and liabilities. Streamline bank connectivity and manage risk exposure.

ESG and green ledger reporting

Track environmental and social impact with ESG-specific reporting and audit-ready transparency.

AI-powered automation

Reduce manual work with embedded AI for anomaly detection, predictive analytics and intelligent journal suggestions.

Built-in audit trails

Maintain full traceability and control with clear visibility across your entire financial landscape.

Predictive insights and planning

Leverage predictive cash flow, scenario planning and embedded analytics to support strategic decisions, reduce risk and increase efficiency.

Grow your own way with SAP Business Suite

When you choose SAP Cloud ERP for enterprise-grade financial management capability, you get access to SAP Business Suite and ecosystem that supports every facet of your growing business.

The SAP Business Suite and ecosystem is a comprehensive suite of modular cloud solutions that offer best-in-class functionality for HR, CRM, eCommerce and analytics. You can also integrate to any platform such as Salesforce, Coupa, Shopify with SAP Business Technology Platform (BTP).

SAP gives you the confidence to scale and adapt with streamlined data flow across your business, reduced manual data entry and duplication of effort, consistent reporting and control, and flexibility to evolve your tech stack to suit your needs.

SAP Business Suite and ecosystem highlights

- **SAP Business Suite** for core operations including finance, logistics, HR and customer relationships
- **SAP Ariba** for procurement and supplier collaboration
- **SAP Concur** for travel, expense and invoice management
- **SAP SuccessFactors** for workforce planning and performance
- **SAP Analytics Cloud** for business intelligence and planning
- **SAP Business Technology Platform (BTP)** for integration, data management and application development

Take financial management to the cloud with Leverage Technologies
